

# Smart Cellular Module

## Features

- Supports LTE Cat. -M1 and NB-IoT technologies.
- Low Power
- Small form factor (1.524"X2.045")
- Better coverage than regular cellular networks.
- Has the priority over other cellular networks
- 

## Applications:

- Measuring and controlling systems
- Industrial applications
- Smart lighting control
- Smart irrigation system
- Gas leak detection

### 1.0 Device Overview:

The SCM-1 is a small form factor, low power cellular cloud-based module, it provides variety of analog and digital functionality. It has been designed with LTE Category-M1 and NB-IoT cellular technologies. LTE Category-M1 is a low-power wide area (LPWA) cellular technology, specifically designed for the Internet of Things (IoT) and machine-to-machine (M2M) communications. LTE Cat M1 needs significantly less bandwidth, requiring total 1.4MHz bandwidth, and supports download and upload data speed less than 1Mbps. which make it suitable for different IoT (Internet of Things) applications.
